Premier Partner PPE Program for NECA Contractors

At NECA's request, Premier Partners Graybar and 3M are working hard to help provide access to an assortment of masks, gloves, glasses and disinfectant for NECA contractors and their workers. The initial list will expand based on requests from NECA contractors and we will include a "demand forecast tool" that will help us meet your needs during this time. To retain the integrity of this supply chain and access to genuine 3M parts, an order site will be available to current NECA member contractors.

We have created a dedicated page within our website with all of the information. Be sure to follow all steps outlined in the **'How to Order'** section. During this process, we ask for everyone's patience. We need you in this partnership with us to work with your members, understanding that because of the limited availability of supplies, especially N95 masks, it is about need vs. want.

Log in to the [NECA website](#) to begin.

Get Started Now

Please contact Wanessa Alves, Director of Member Relations at 301-215-4532 or wa@necanet.org with any questions about the program.

We encourage our contractors to take advantage of this generous offer. Please keep in mind there is limited availability and PPE priority will be given to high risk projects.
